SUMMARY

■ Summary
- In our form, if we make a normal checkbox
- We will give this div a class, let's say normal
- We have given a class from our side and we will give one more class which is mb3
- So, we will write the form check input into the label
- We include both the options in our label as well.

QUESTIONS

■ Questions
- How do we add the form check input into the label?

TRANSCRIPT

our checkboxes and radio buttons. So, incom very frequently use and check boxes go by default, diffe
