Lecture Summary

Checkboxes are by default different style

We have to step on bootstrap

This class we have given us in our own way

If we make a normal checkbox, like a div in this div, we will give class in our class

And a court class is given which is mv3

So here we take a label label

This label is a label

It's a label for a label and a label

The label is given a label, and the label is the label .
